Day 01 - Network Devices

22 cards | network fundamentals | device recognition | security basics

QUESTION

A computer network is a digital telecommunications network which allows [...] to share resources.

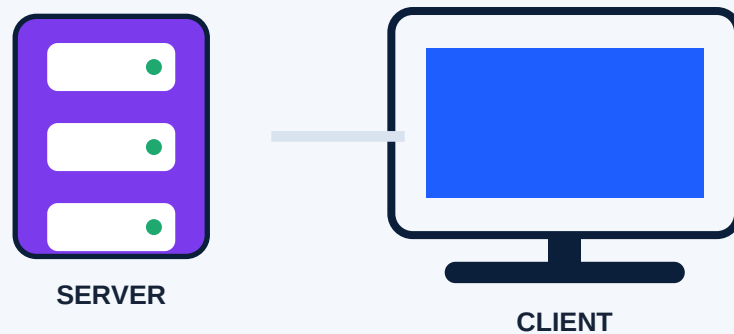

ANSWER

nodes

A network connects nodes so they can communicate and share resources.

QUESTION

[...] and [...] are also known as 'end hosts' or 'endpoints'.

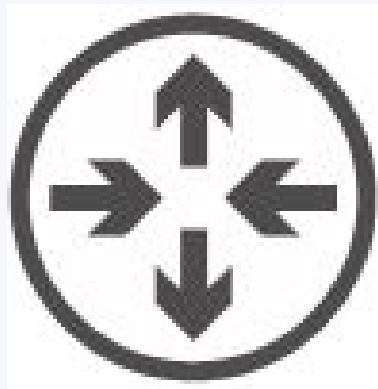

ANSWER

Servers / clients

Endpoints are the devices at the edge of the network.

QUESTION

What does this symbol represent?

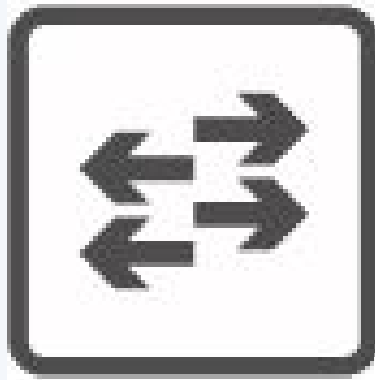

ANSWER

Router

A router connects different IP networks and forwards packets between them.

QUESTION

What does this symbol represent?

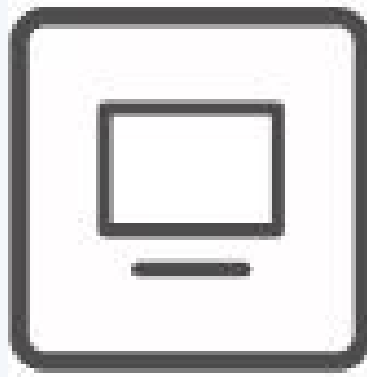

ANSWER

Switch

A switch connects devices inside a LAN and forwards Ethernet frames.

QUESTION

What does this symbol represent?

ANSWER

Client

A client consumes a service, such as a web browser using a web server.

QUESTION

What does this symbol represent?

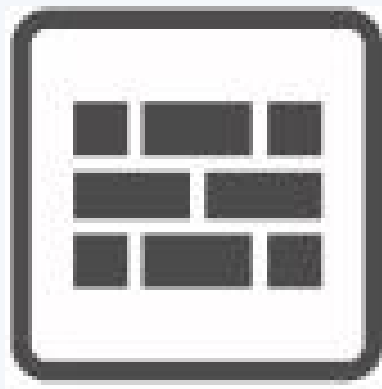

ANSWER

Server

A server provides a service, such as web, DNS, file, or email services.

QUESTION

What does this symbol represent?

ANSWER

Firewall

A firewall permits or blocks traffic according to security rules.

QUESTION

A [...] is a device that accesses a service made available by a server.

CLIENT

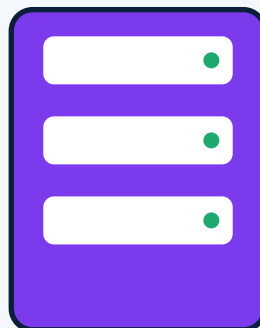

ANSWER

client

Client = service consumer.

QUESTION

A [...] is a device that provides functions or services for clients.

SERVER

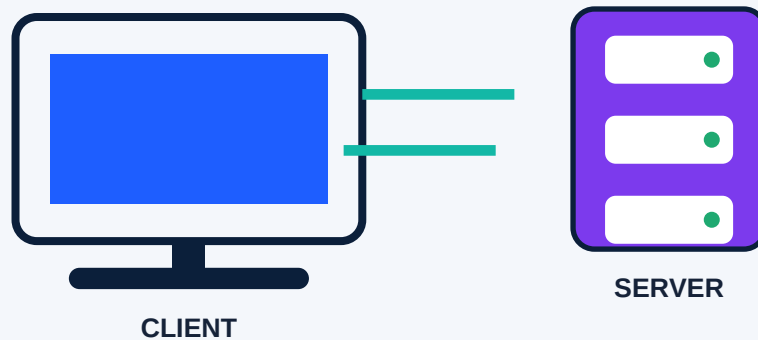

ANSWER

server

Server = service provider.

QUESTION

Can a single device be both a client and a server?

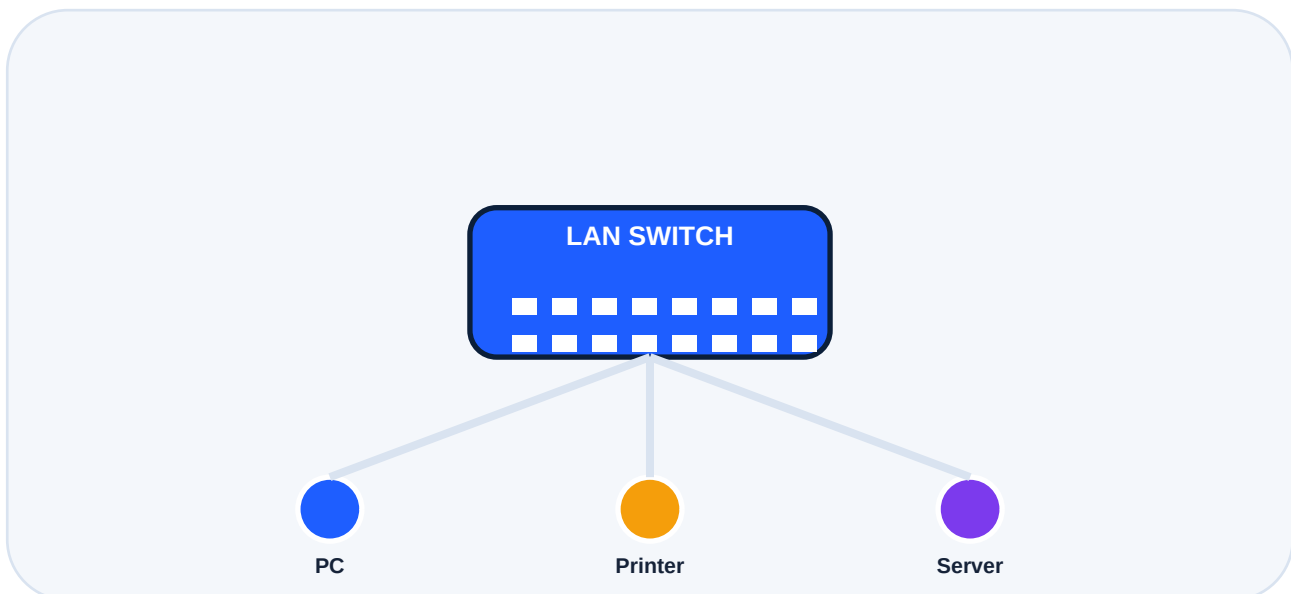

ANSWER

Yes

A device can consume one service while providing another.

QUESTION

What does LAN stand for?

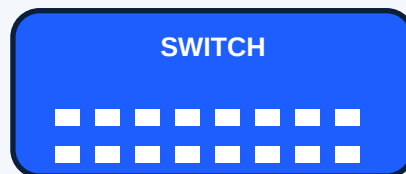

ANSWER

Local Area Network

A LAN usually covers a limited area such as a home, office, or campus segment.

QUESTION

A [...] provides connectivity to hosts within the same LAN.

ANSWER

switch

Switches are the central Layer 2 connectivity devices in Ethernet LANs.

QUESTION

A [...] has many network interfaces for end hosts to connect to.

Many ports for end hosts

ANSWER

switch

Access switches provide many physical ports for endpoint devices.

QUESTION

What kind of network device is a Cisco 'Catalyst'?

CISCO CATALYST

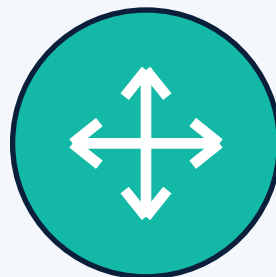

ANSWER

Switch

Cisco Catalyst is a major family of enterprise switching products.

QUESTION

What kind of network device is a Cisco ISR?

CISCO ISR

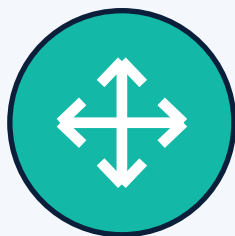

ANSWER

Router

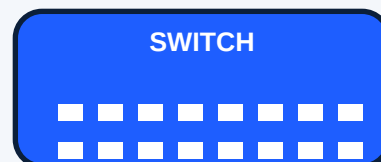

ISR stands for Integrated Services Router.

QUESTION

Routers have [...] network interfaces than switches.

ROUTER
fewer interfaces

SWITCH
many access ports

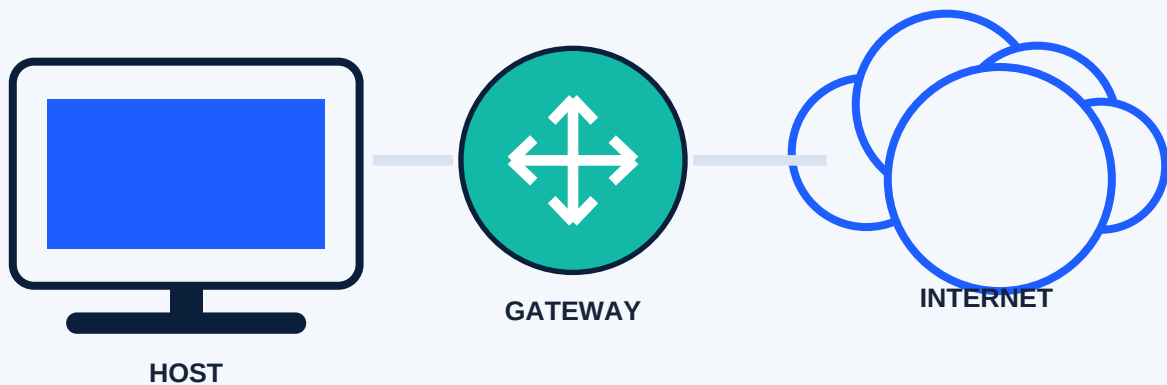

ANSWER

fewer

Routers generally connect networks; switches commonly provide many access ports.

QUESTION

A [...] is used to send data over the Internet.

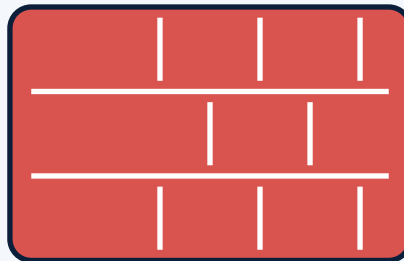

ANSWER

router

The default gateway is typically a router that forwards traffic outside the local network.

QUESTION

A [...] monitors and controls network traffic based on configured rules.

FIREWALL

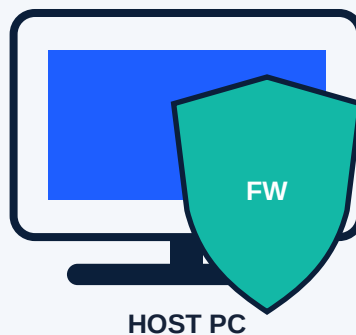

ANSWER

firewall

Firewall policy defines which traffic is allowed, denied, or inspected.

QUESTION

[...] firewalls are software applications that filter traffic entering and exiting a host machine, like a PC.

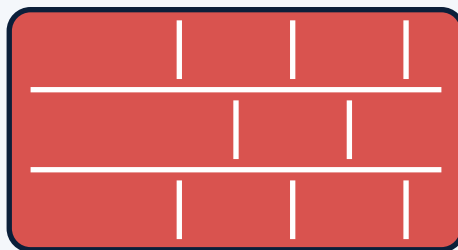

ANSWER

Host-based

A host-based firewall runs directly on an endpoint or server.

QUESTION

What kind of network device is a Cisco ASA?

CISCO ASA

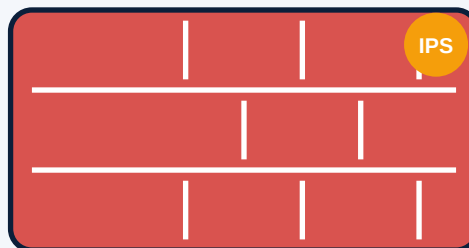

ANSWER

Firewall

Cisco ASA is a security appliance family traditionally used for firewall and VPN functions.

QUESTION

What kind of network device is a Cisco Firepower?

CISCO FIREPOWER

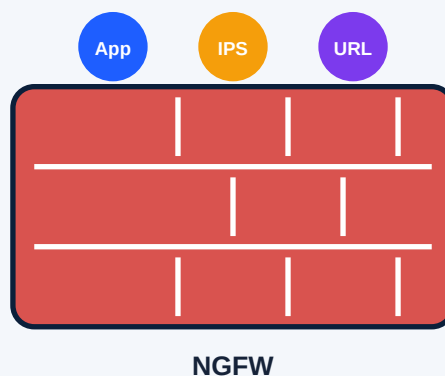

ANSWER

Firewall

Cisco Firepower provides next-generation firewall and threat inspection capabilities.

QUESTION

A firewall which combines a traditional firewall with more advanced filtering functionalities is known as a '[...] firewall'.

ANSWER

next-generation

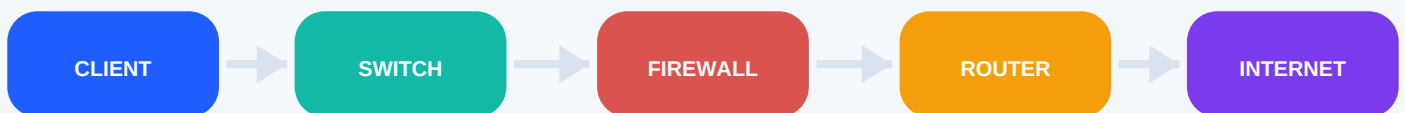

NGFWs add deeper inspection and security features beyond basic packet filtering.

DAY 01 - QUICK REVIEW

Core device roles

	Client	Consumes a service
	Server	Provides a service
	Switch	Connects devices within a LAN
	Router	Connects different networks
	Firewall	Controls traffic using security rules

Remember this traffic path

Security terms to remember

Host-based firewall	Runs on an individual host.
ASA	Cisco firewall/security appliance family.
Firepower	Cisco next-generation firewall/threat platform.
NGFW	Firewall + advanced inspection/filtering capabilities.
